# Survivability gateway

One page pulled from the Canon rooms named in the source column. Open the room before you quote a number in a design. This is not a copy of a Cisco document.

| Check | What the room says | Source |
|---|---|---|
| Where do endpoints register in Active mode? | To the Webex cloud. [cite:1] | T2-R07-survivability-gateway.html |
| Where do they register in Survivability mode? | To the local Survivability Gateway. [cite:1] | T2-R07-survivability-gateway.html |
| How long must the cloud path be back? | At least 30 seconds. [cite:1] | T2-R07-survivability-gateway.html |
| What IOS starts the feature set? | IOS XE Dublin 17.12.3. Hunt group, call forward, and auto attendant start at 17.18.2. [cite:1] | T2-R07-survivability-gateway.html |
| What certificate types are refused? | Private or enterprise CAs, and wildcard certificates. [cite:1] | T2-R07-survivability-gateway.html |
| What hunt-group cap applies in this mode? | 100 groups, 32 users each. Weighted routing is not supported. [cite:1] | T2-R07-survivability-gateway.html |
| What does Webex App support during the outage? | Internal extensions, PSTN in and out, outgoing emergency, hold and resume, transfer, inbound caller ID, and shared call appearance. [cite:2] | T2-R07-survivability-gateway.html |
